***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lustenberger (4570881) in view of Kleven (5003295).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to mount the ice detector of Lustenberger on a probe with a concave portion with beveled edges as taught by Kleven since it will improve the early detection. See the abstract and col 4 lines 41-45 of Lustenberger. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the fluid heating and cooling described in col. 4 lines 41-45 a heat pump since this is a well know fluid heating/cooling means.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
